

Energy Management Policy

Everlight Chemical acknowledges the importance of implementing energy management in low-carbon transformations and sustainable developments; Our Energy Management Policy is:

Improve Energy Performance, Towards Net Zero Sustainability.

We adopt the following strategies:

1. Implement and continuously improve the ISO 50001 Energy Management System.
2. Ensure that the information and resources needed to meet energy objectives and targets.
3. Comply with applicable regulations and signed energy-related requirements.
4. Purchase energy efficient products and services and use low-carbon energy.
5. Support energy performance improvement in design activities.
